

## BIG 5 PSYCHOLOGICAL TRAITS THEORY

A common human intuition is that people behave in a characteristic way and thus people can be grouped into categories based on their behavior. In psychological trait theory, the Big Five personality traits, is a way of grouping individuals based on personality traits.

## ML BASED MATCHING MAKING

Our unique ML algorithm is based on analyzing the 5 major personality traits of individuals (referred to as The Big 5 traits or OCEAN traits), and finding the most compatible match as predicted by our unique algorithm. Then, you can choose a partner as per personal preferences.

## A USER GUIDE:

### FIND YOUR TRUE LOVE

Your true are just few click away.

### ARTIFICIAL INTELLIGENCE

These a saying that:

"The coming era of artificial intelligence will not be the era of war, but be the era of deep compassion, non-violence, and love."

We make prediction with high accuracy.

### WE BELIEVE THAT

Power of machine learning can find you a perfect partner.

## Overlook of personality traits

### Extraversion:

Extraversion is characterized by being excited, sociable, talkative, assertive.

### Agreeableness:

Agreeableness includes factors such as trust, generosity, kindness, affection

### Openness:
